Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

NEW AND STANDARD TEXTS

Wilson and Tracey's Analytic Geometry
This book presents in a short course those parts of Analytic Geometry which are essential for the study of Calculus. The text is adapted for use in classes which aim to cover in one year the fundamental principles and applications of both Analytic Geometry and Calculus.

Fite's College Algebra
The clearness, brevity, and rigor of this book won for it widely extended use. Its perfect adaptation to the needs of college classes is indicated by its steadily increasing sale.

Miller and Lilly's Analytic Mechanics
A course that is distinctly teachable, practical, rigorous, and adaptable. Abundant problems and exercises are included.

Wells and Hart's Solid Geometry
The Wells and Hart Solid Geometry has the same qualities of originality and practical efficiency that have won for their Plane Geometry so wide and enthusiastic favor.

Burkhardt's Theory of Functions of a Complex Variable
Authorized translation, with the addition of figures and exercises by S. E. Rasor.

Boston New York Chicago Atlanta San Francisco London

LYMAN AND DARNELL'S
Elementary Algebra

By ELMER A. LYMAN, Professor of Mathematics, Michigan State Normal College, Ypsilanti, Mich., and ALBERTUS DARNELL, Head of the Department of Mathematics, Central High School, Detroit, Michigan.

Simplicity and completeness are the distinctive features of this new algebra for secondary schools. It meets the requirements of courses of study in various States and of the College Entrance Examination Board. Unduly puzzling exercises are omitted; nonessentials have been strictly eliminated; easy oral drills help the pupil to understand the subject.

Its problems include applications to geometry, physics, agriculture, commerce, and various interests of everyday life.

NEW YORK CINCINNATI CHICAGO BOSTON ATLANTA

CONTENTS

The May Meeting of the Maryland-Virginia-District of Columbia Section. By Mr. O. S. Adams 343

The April Meeting of the Iowa Section. By Professor L. M. Coffin . . . 346

The Average Reading Vocabulary; An Application of Bayes's Theorem. By Professor Warren Weaver 347

A Graphical Aid in the Study of Functions of a Complex Variable. By Professor Norman Miller 354

Modular Geometry. By Professor A. A. Bennett 357

Questions and Discussions: Questions—Replies 15, 30, and 57; New Questions 39, 40; Discussions—"Note on the solution of fractional equations" by Professor C. A. Noble; "Determination of an angle of a right triangle without tables" by Professor R. A. Johnson 361

Recent Publications: Reviews—By Professor J. K. Whittemore, etc.; Articles in Current Periodicals; American Doctoral Dissertations 369

Problems and Solutions: Problems—2850–2857; Solutions of Problems—2753, 2754, 2755, 2756, 2757 377

Notes and News 382

EDITORIAL CORRESPONDENCE AND BOOKS FOR REVIEW should be addressed to the Editor-in-Chief, R. C. Archibald, Brown University, Providence, R. I.

BUSINESS CORRESPONDENCE should be addressed to the Secretary-Treasurer of the Association, W. D. Cairns, Oberlin, Ohio.

Fifth Summer Meeting of the Association, Chicago, September 6, 1920;
Fifth Annual Meeting, Chicago, December 28–29, 1920

The following are dates of Section meetings of the Association in 1920:

Iowa, Univ. of Iowa, Iowa City, May 1
Kansas, State Agricultural College, Manhattan, April 3; Topeka, November
Kentucky, Centre College, Danville, April 17
Maryland–District of Columbia–Virginia, Goucher College, Baltimore, Md., May 15; Annapolis, Md., December
Minnesota, St. Catherine's College, St. Paul, June 5
Missouri, Kansas City, November 12–13
Ohio, Ohio State Univ., Columbus, April 2
Rocky Mountain, Colorado College, Colorado Springs, April 2

Volumes and Sets of the Monthly

Complete sets of the Monthly (1894–1920) are obtainable only occasionally through dealers in periodicals, but many single numbers and complete volumes (1894–1912) may be had through the Secretary at varying prices, according to scarcity of stock.

Volumes for 1913, 1914 and 1915 will be sold, when available, *only to members of the Association who can thereby make up complete sets*—price, $5.00.

Most of the volumes for 1916–1920 can be obtained through the Secretary at $4.00, but scarcity of a few issues here also will raise the price of certain volumes to $4.50 or $5.00.

Address all communications to the Secretary,

W. D. CAIRNS
Oberlin, Ohio

THE NEW ERA PRINTING COMPANY

LANCASTER, PA.

Is prepared to execute in first-class and satisfactory manner all kinds of printing and electrotyping. Particular attention given to the work of Schools, Colleges, Universities, and Public Institutions.

Books, Periodicals

Technical and Scientific Publications

Monographs, Theses, Catalogues

Announcements, Reports, etc.

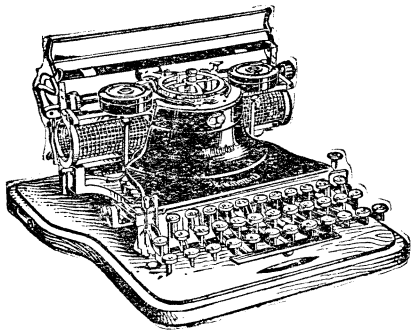
All Kinds of Commercial Work

(*Printers of the Bulletin and Transactions of the American Mathematical Society, etc., etc.*)

Publishers will find our product ranking with the best in workmanship and material, at satisfactory prices. Our imprint may be found on a number of high-class Technical and Scientific Books and Periodicals. Correspondence solicited. Estimates furnished.

THE NEW ERA PRINTING COMPANY

Mathematical Special—Premier of the Profession



No Other Typewriter Can Do This

Enables the *amateur* to write as neat appearing letters *from the very beginning* as the experienced operator.

The "Mathematical Special" model of the MULTIPLEX HAMMOND carries 120 distinct characters; about 30 additional ones can be made with simple combinations. "No other typewriter can do this." It has no equal in the mathamatical profession.

Aside from these remarkable features, every

MULTIPLEX HAMMOND

"WRITING MACHINE"

carries two different styles of type, or two languages, in the one machine. "*Just Turn the Knob*" and change. There are more than fifty different languages in many sizes and styles which can be substituted in a few seconds.

The first paragraph, and the one following, show a few of the 365 different arrangements of types and languages (slightly reduced) *instantly changeable on the Multiplex Hammond:*

A Revelation in Typewriterdom

The Multiplex Hammond is unquestionably the most remarble typewriter in existence. Why? *Because of its versatility.*

Think of it—"Just Turn the Knob" and you can change from ordinary Roman to Italics—INSTANTLY—or from large Gothic to Miniature—INSTANTLY—or from English to Russian—INSTANTLY!

Note the 10 styles of type opposite, all written on the same machine.

Petite - for extra condensing
Miniature - for refined letters
Small Roman-neat business
Script - private correspondence
Medium Roman-general letters
Italic - emphasizing.
SPECIAL GOTHIC - CLEAN CUT
Large Gothic - sermons, lectures
Large Roman - sermons, lectures
Clarendon - new, attractive

Writes Anything, Anywhere, Any Way!

Business executives, sales managers, doctors, lawyers, advertising men, writers, druggists, linguists, students—men, women and children in all walks of life—find they can do clearer, cleaner, better work on the Multiplex Hammond. Tell us what your business or vocation is and our Service Department will give you *free*, full details of the particular Multiplex Hammond that is best adapted to your needs.

Our new mathematics folder will be sent to you, free. Write for it *now*—sign and mail the Coupon below, and mail to—
